

REVOLUTION® Floor Flood Feeders

The Simplicity of Floor Flood Feeding
with Higher Performance and Control

Let's grow together.

Comfortable birds eat more, waste less and go to market faster

Add more comfort, performance and efficiency to your floor flood feeding program without adding management steps. Chore-Time's REVOLUTION® Feeder is now available in a traditional floor flood system. The REVOLUTION® Feeder, with its patented comfort grill, has been shown to increase daily gains and enhance feed conversion in broiler flocks.

It's not surprising that the newest advancement in floor flood feeders comes from the company that introduced the poultry feeder flood window more than twenty years ago. Others try to copy our feeder systems, but there's no duplicating the results you get from our latest pan design.

For even more feed control at any pan height, ask your Chore-Time distributor about our REVOLUTION® Rotary Gate Feeder.

REVOLUTION® Floor Flood feeder pans feature our extended five-year prorated warranty. (See Chore-Time's full written warranty for complete warranty details.)

REVOLUTION® Floor Flood Feeders

The Only Floor Flood Feeder with Chore-Time's Revolutionary Comfort Grill

Designed to fit the natural way birds eat

Chore-Time engineers carefully observed the movements of birds as they eat to design the comfort grill featured on all REVOLUTION® Feeders. The scalloped edge conforms to the shape of the birds and provides a comfortable indentation that allows them to get closer to the feed. Perfect for broilers that are bred for larger breasts. The high-clearance grill lets birds freely lift their heads to allow natural movement while eating. Because birds don't have to back out of the feeder to swallow, more feed is consumed and less feed ends up on the floor.

Flood feeding for fast starts and easy brooding

How low does your flood feeder go? The REVOLUTION® Floor Flood Feeder gives even the smallest chicks easy access, but quickly teaches birds that they can reach the feed without crawling inside. It starts training birds immediately to efficiently consume feed – with no extra effort and no extra waste.

Controlled feeding for profitable grow-outs

The REVOLUTION® Floor Flood Feeder adjusts to your management style. Raise the feeders higher to close the flood windows as the birds grow. Only Chore-Time lets you manually lock the windows into flood position at any pan height, giving you the option to provide free-choice feed at any growth stage. You can also choose one of six grow-out feeding levels to optimize days to maturity or final market weights.

Bird Weight	Recommended Feeder Model	Birds per Pan
Up to 4.5 lbs. (2.0 kg)	12-spoke	60-90
4.5-7.0 lbs. (2.0-3.1 kg)	12- or 8-spoke	55-75
7.0 lbs. (3.1 kg) or greater	8-spoke	45-65

Feed line capacity is 17 lbs./min. (7.7 kg/min.) at 348 RPM, based on feed density of 40 lbs./ft³ (650 kg/m³).

Chore-Time's REVOLUTION® Feeder Pan Assembly is 1/2 inch lower at the eating area. It controls waste like a deep pan, yet offers easy access like a shallow pan.

Conventional feeder pans (left) were deep with a narrow feed surface area. Chore-Time's REVOLUTION® Feeder Pan (right) has a broad feed surface area that is easier for young birds to reach. The eating area is also thicker.

The scalloped perimeter of Chore-Time's REVOLUTION® Feeder matches the shape of today's birds. It is rounded and smooth for comfort.

The grill's edge overhangs the pan to help keep feed from being raked out of the feeder.

The T-shaped spokes and high-clearance grill of Chore-Time's REVOLUTION® Feeding System make the feeders easier for birds to exit.
