

# HIGH VOLUME FIBERGLASS FANS

*move lots of air with exceptional efficiency*

- Aerodynamic design:
  - Smooth interior finish of housing reduces resistance.
  - The hood outlet diameter is greater than the fan propeller diameter allowing for unrestricted airflow through the hood.
- Fiberglass housings offer consistent airflow year round. Plastic housings lose their shape during hot weather reducing air flow at a time when maximum airflow is needed.
- 3/16" housing wall thickness ensures rigidity and durability.
- Lifetime warranty on fiberglass housing.
- Slant wall housing design drains any moisture or condensation to the outside of the building, preventing the freezing of the blades.
- Exit safety grills are baked enamel for corrosion resistance.

## Available in 36" and 48" diameter

- All hardware is stainless steel for long lasting performance.
- Propellers are available in galvanized or stainless steel.
- Optional "Quiet" six-blade propellers are available for the 48" fan.
- High quality greaseable pillow block bearings.
- Automatic belt tensioner ensures correct belt tension at all times.

# HIGH VOLUME FIBERGLASS FANS

## Marathon motors

- Totally enclosed, air over, rigid base.
- Capacitor start / capacitor run design for higher efficiency.
- Ball bearings.
- Automatic reset thermal protector.
- Fully gasketed.

Shutters

Winter cover

## Shutters and Winter cover

- PVC shutters are available in white or black.
- Shutters mount flush on the inside of the building.
- Shutters open easily when fans are running on low speed.
- Insulated winter covers replace the shutters during winter months if the fan is not required to operate.

## Specifications for Marathon motors

Dia.	HP	Voltage	Amp	RPM	Drive	Blade	Wall opening	CFM @ .05" sp
36"	1	115 / 230	9,2 / 4,6	1025	Belt	3	43" X 43"	12100
48"	1 1/2	115 / 230	13,6 / 6,8	460	Belt	6	55 1/2" X 55 1/2"	22800

1 year warranty
