

Custom Auto Winch Systems

- ✓ Powerful drive unit - lift multiple lines together
- ✓ Quiet operation - birds remain calm
- ✓ No need for extension cords, no worry of dead drill batteries
- ✓ Time saving height adjustment of lines
- ✓ Can be used for presentation feeding (breeders)
- ✓ Galvanized components for long service life
- ✓ Extends cable life over typical drum winches (cable wraps only in 1 layer)
- ✓ Less height adjustment issues than typical ceiling winches, even compared to winches with straps
- ✓ Comes with adapters for manual override (using power drill) for peace of mind

NEMA4X switches with spring return to neutral position for simple, safe operation.

Sealed roller bearings provide quiet operation.

Virtually no maintenance in the entire system.

System Options:

- Systems for feeders, drinkers, circ fans, H/W heat etc.
- Can adapt to cathedral ceilings (U-Joint Option)
- Limit switch option for high / low position
- Simple manual switches or integration with time clock for presentation feeding
