Introducing BW Solo Ammonia Sensor

Minimum ventilation rates are critical to bird health no matter what type and age of bird you have. How do you verify air quality in your facility? For portable options we recommend the BW series gas detectors from Honeywell.

Features:

- Easy to read backlit display
- Bluetooth connectivity to retrieve datalogging
- Robust, water resistant, concussion-resistant boot with belt clip
- Audio, visual & vibrations alarms with high / low setpoints
- Highest quality on the market

We service what we sell. Sensors of this nature should be calibrated every 6 months to remain accurate. Why buy anything that leaves you questioning the accuracy of the readings?

Book your new barn project with CountyLine in 2019 and receive a combo CO2 / NH3 meter for free!
