

Dead Bird Removal System

A Solution

If you have ever picked up dead birds in a poultry house you've probably thought, "There has to be a better way." We believe we have found the solution you are looking for. The user-friendly "Poultry Hawk" not only eliminates the tiresome chore of lugging five gallon buckets filled with dead birds; its hands-free operation also allows for better culling.

The "Poultry Hawk" is a trolley that runs on a track system mounted to the ceiling of your poultry house. The well-built "Hawk," with its versatility and automation, works hard to make your work easier.

So, the next time you think, "There has to be a better way," remember the "Poultry Hawk!" It is proving itself to be **A BETTER WAY.**

- ☐ Dumping basket
- ☒ Fixed basket
- ☒ Upgradable

“Since installing our Poultry Hawk in two different-aged poultry houses (1984 and 2010), it has made our job much easier. A must for people of any age, it gives you a break from lots of carrying. A user-friendly machine, the Hawk is easy to take off the track if needed. I highly recommend it to all types of poultry growers. Check it out!”

– Gary and Janet Wood, VA
