

Poultry Hawk

Versatile. Automated. User-Friendly.

Premium
Automated Trolley with
Auto Dump

E-series
Automated Trolley with
Manual Dump

Remove birds | Tote feed | Carry eggs | Maintenance cart

The original Premium Series was created for poultry farmers to have "A better way" to carry out daily tasks in the barn. The trolley system rolls along a heavy duty track to save lugging pails of dead and culls down the length of the barn making chores easier and more enjoyable. The system is available with

a host of options that can be added right away or down the road.

Designed by a farmer for farmers:

- Powered by deep cycle 12V battery for long lasting operation
- Dock charger option for automatic charging
- High quality swagged rail system is quick and easy to install

- Powder-coated construction
- 450 lb basket capacity
- Can be completely manual or automated with reliable control panel
- Great way to help you deal with dead birds, tote feed, carry egg flats or load with tools and parts to perform regular barn maintenance.

"After installing a **Poultry Hawk** in one of our three chicken houses, and seeing the time and energy savings it brought, there was no question whether to install **Poultry Hawks** into the other two houses. We cannot imagine farming without them."

Alex Heatwole, VA
