

THE TALON

POULTRY EUTHANIZING SYSTEM

Humane. Quick. Final.

The Talon™ is a user friendly and effective way to euthanize poultry using CO². Collect a few culls in the bucket, place the bucket in the holder, press the button and let the Talon™ run its cycle. With the Talon™, you not only have an easy way to euthanize, but you can also enjoy the peace of mind that you are using an approved method of animal welfare.

Talon Features:

- Portability—one unit can be used for multiple sites.
- Powered by Dewalt 20V battery
- Mount to a wall or pair it with a Poultry Hawk™ trolley system
- Simple push button operation
- Monitoring sensors & indicator lights to ensure proper operation
- Uses common 20lb. CO² bottle
