

Turbofence™

A-SHAPED PLASTIC MIGRATION FENCE

New! Anti-Migration Fence for broilers by Sephnos. An A-shaped fence manufactured with 100% virgin plastic with anti-UVA and UVB properties, as well as other additives to achieve greater resistance and durability.

Formed by thick vertical (19) and horizontal (8) structures that provide a perfect reticulum with uniform spacing.

All are fully fused between them to provide a solid, compact, resistant, and durable structure with out the need for any wired bindings. The upper horizontal structure is rippled to prevent chickens from perching, while the lower horizontal structure has a series of anchors (19) that provide traction with the bedding material.

- Measures approx: 10" w x 15" h x 46" l
- Weight: 2.2 kg (5 lb)

**Excellent airflow
without deflection**

INCREASE LIVE WEIGHT & CONSISTENCY

Place barriers every 20 to 30 meters—which helps to maintain an adequate density of chickens per feeder and drinker

DISEASE CONTROL

Anti-Migration fencing helps to controls density. Limit disease spread with corralled spacing*

ROI

Replaces traditional "chick guard" cardboard fencing and can be permanently installed on a winch system

Accessory:
Cover wall

* From TIP 53 | POULTRY FARMING | The importance of anti-migratory barriers within conventional broiler houses | Sephnos July 4, 2024
