

The Poultry Hawk® Rail and Trolley System

The Poultry Hawk® by Innovative Poultry Products reduces the labor needed for daily tasks in your poultry house—transporting feed, eggs, and mortality. Installed overhead along the length of your house, this rail and trolley system reduces physical strain, saves time, and helps you retain experienced workers by eliminating repetitive lifting that can cause injury and fatigue.

Key Benefits

Saves time:

Moves more in fewer trips through your house

Handles the load:

Carries feed, eggs, and deadstock so you can walk your houses with a grabber or free-handed

Reduces labor and strain:

Makes daily tasks less demanding for the skilled hands on your farm

Adapts to your structure:

Fits custom layouts and varying chicken house configurations with modular rails

System Options

Rail Options

The Poultry Hawk® includes a modular overhead monorail system (available in 12' and 24' sections) that can be configured as a continuous loop or straight run to match your operation.

Trolley Options

The rail system supports two trolley options. Premium and E-series trolleys have a carrying capacity of 450 lbs. Both models can be fitted with fixed or dumping baskets, motors, and remote operation.

E-Series

Made with galvanized material and bolt-together construction for low-cost, easy maintenance. Motorized models use 18 or 20-volt tool batteries.

Premium Series

Made with powder-coated material and welded construction for extra durability. Motorized models use 12-volt deep-cycle batteries for greater power and performance. Available with an electronic dumping basket and an extra port for powering accessories.

Premium Automated Trolley with Auto Dump

E-series Automated Trolley with Manual Dump

“After installing a **Poultry Hawk** in one of our three chicken houses, and seeing the time and energy savings it brought, there was no question whether to install **Poultry Hawks** in to the other two houses. We cannot imagine farming without them.”

Alex Heatwole, VA
